

SD-250

Defoamer for urethane

General

- Antifoam / defoamer for Urethane

Feature

- Long-lasting effects
- Great fast defoaming
- Easy to handle and use
- The higher the rate of the adding defoamer, the softer the urethane material

Shelf life

- When stored under the usual appropriate storage conditions, the product can be stored for 1year

Composition

- Hydrophobic material and liquid optimized for urethane

Dosage

- A dose of 1.0 - 10.0% calculated on total formulation is recommended for effective defoaming during production and application

Typical properties

- | | |
|---------------------------|--------------|
| • Appearance | Light yellow |
| • Specific gravity [20°C] | ~1.15(±0.02) |
| • Viscosity [20°C] | ~3,000cps |
| • Ionisity | Non-ionic |
| • Active contents | 100% |
